29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

**Extremely dry conditions make control difficult, spotting, large area of uncontrolled fire line, Thunderstorm activity with little rain. Firefighter fatigue. Sea breezes pose difficulties in line containment. Reburning due to needle fall in areas that were previously burned.**

30: Observed Weather for Current Operational Period

Peak Gusts (mph): **10** Max.

Temperature: **94**

Wind Direction: **W** Min.

Relative Humidity: **45**

31: Fuels/Materials Involved: **7 Southern Rough Palmetto, Gallberry, TY TY, pine straw, hardwood understory**

32: Today's observed fire behavior (leave blank for non-fire events):

**Ground fire activity. Creeping and smoldering with slight runs. reburn in stands**

33: Significant events today (closures, evacuations, significant progress made, etc.):

**Fire recieved approximately 2 inches of rain during the early night hours. An aerial flight was made and the fire was mapped by GPS. Burnouts were accomplished.**

34: Forecasted Weather for next Operational Period

Wind Speed (mph): **8** Temperature: **98**

Wind Direction: **w** Relative Humidity: **42**

35: Estimated Control

Date and Time:

**06/25/2011 1400**

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

**Complete and improve line on eastern flank, secure Racepond community and mopup Fort Mudge community.**

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **High**

2. Difficulty of Terrain - **Medium**

40: Given the current constraints, when will the chosen management strategy succeed?

**Without significant rain (hurricane) event control is unlikely in the near future**

41: Projected demobilization start date:
